

## K-LIFE OFFERS PROVEN RESULTS

K-LIFE was developed by Kowalski Heat Treating Company in 1985. K-LIFE is the solution to costly problems often experienced in the tooling industries. Through a revolutionary, unique, and highly effective process, K-LIFE increases the physical properties of your material.

K-LIFE is not a surface coating or a temporary physical treatment. In Fact, one of the most popular features of K-LIFE is the subsequent ability to re-grind or re-machine when necessary - without retreatment. As an additional step in the heat treating process, our process allows for superior edge retention, and proven increase in wear resistance. Whether a high speed tool steel or an oil hardening tool steel, K-LIFE has been effective in offering new alternatives to old problems.

Through continuing research, Kowalski Heat

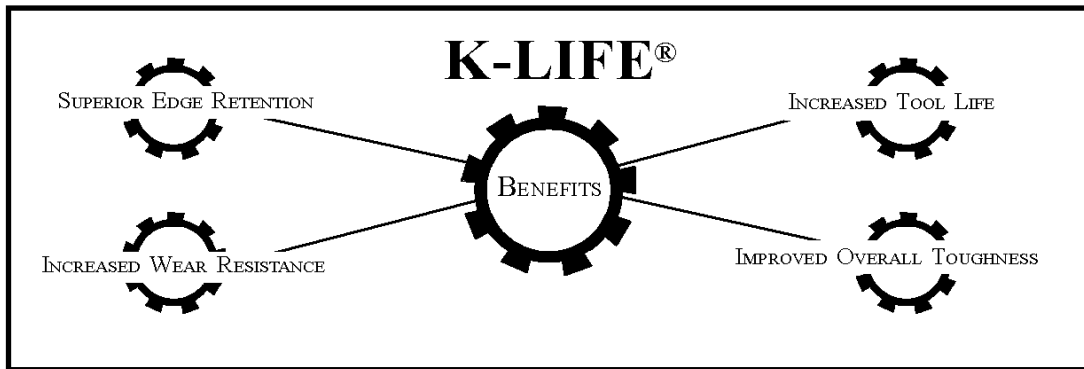

Treating Company has fine-tuned the K-LIFE process. To ensure consistent processing of your materials, our quality assurance team conducts uniformity tests on all processed work. You can be assured of our quality

K-LIFE IS NOT A SURFACE COATING, OR A TEMPORARY PHYSICAL TREATMENT

### THE BOTTOM LINE

In applications where costly tool replacements are getting the best of your bottom line, K-LIFE is your answer. Why spend your profits on tool replacement when K-LIFE offers you a cost-effective solution? We are confident that K-LIFE will work for your applications. Call us today to arrange a sample run....
